

HOPA's Prioritized Issues

- The Board identified the need to prioritize the top issues that could affect HOPA, its members, and/or the patients we serve.
- The list we derived from discussions with the Board, committees, and from discussions on HOPA Central.
- Over a 6-month period, the Board participated exercises to prioritize the issues and reach consensus on the importance of each.
- Issues were assigned a score based on Reach, Impact, and Confidence.
- Where appropriate, the prioritized issues have been incorporated into the strategic plan and committee goals.
